RE: INITIATION A ANTIDUMPING DUTY INVESTIGATION ON
SULFANILIC ACID FROM THE PEOPLES REPUBLIC OF CHINA
(A-570-815)

1. The Department of Commerce initiated an antidumping duty investigation on October 29, 1991, on sulfanilic acid from The People's Republic of China.

2. The products covered by this investigation are all grades of sulfanilic acid which include technical (or crude) sulfanilic acid, refined (or purified) sulfanilic acid and sodium salt (aminobenzenesulfonic acid). Sulfanilic acid is a synthetic organic chemical produced from the direct sulfonation of aniline

with sulfuric acid. Sulfanilic acid is used as a raw material in the production of optical brighteners, food colors, specialty dyes, and concrete additives. The principal differences between the grades are the undesirable quantities of residual aniline and alkali insoluble materials present in the sulfanilic acid. All grades are available as dry, free flowing powders.

3. Technical and refined sulfanilic acid are provided for in the HTS under subheading 2921.42.24. Sodium salt is provided for in the HTS under subheading 2921.42.70.

4. Liquidation of entries is not to be suspended without specific instruction.

5. For further reporting purposes this case has been assigned investigation number A-570-815.

6. If there are any questions regarding this matter by Customs Officers, please contact Via E-Mail, through the Regional Antidumping/Countervailing Duty Coordinator, the Trade Compliance Division, Antidumping/Countervailing Duty Branch using attribute "HQ OAB." The importing public and other interested parties should refer their questions to James Terpstra of the Office of Antidumping Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce (202) 377-3965.
